

AtliQ HR Presence Insights – Workforce Attendance Analytics (Power BI Project)

1. Project Name

AtliQ HR Presence Insights – Workforce Attendance Analytics Dashboard

2. Problem Statement

- Organizations need visibility into employee attendance, remote work behavior, and leave trends.
- Without analytics dashboards, HR teams struggle to identify absenteeism patterns and workforce issues.
- This project analyzes employee attendance data to monitor presence, WFH usage, and sick leave behavior.
- The goal is to provide HR managers with insights that support data-driven policy and workforce decisions.

3. Techniques Used

- Data cleaning and transformation using Power Query.
- Data modeling with relationships between employee, calendar, and attendance datasets.
- DAX measures to calculate Attendance %, WFH %, and Sick Leave %.
- Interactive Power BI visuals including KPI cards, trend charts, and employee-level tables.
- Day-of-week analysis to identify behavioral attendance patterns.

4. Key Insights

- Overall attendance remains healthy at approximately 92% across the quarter.
- Attendance dropped significantly in May to 89.7%, the lowest month in the dataset.
- WFH usage peaked in May at around 11.2%, with a spike above 23% early in the month.
- Sick leave increased from April (0.4%) to May (1.7%), indicating possible workload stress or seasonal health factors.
- Fridays consistently show the lowest attendance and the highest WFH percentage.
- Some employees demonstrate unusually low attendance patterns requiring HR attention.

5. Business Recommendations

- Investigate the attendance drop in May through employee feedback and manager discussions.
- Implement a flexible or hybrid Friday policy aligned with employee behavior patterns.
- Introduce employee wellness programs to reduce sick leave and burnout.

- Conduct HR follow-ups for employees with consistently low attendance.
- Analyze mid-month workload spikes that may contribute to absenteeism.
- Develop balanced hybrid work policies to support productivity and employee satisfaction.
